

The Architecture of Encounter

Index Term List — Draft 1

Working document for index preparation

This document is a controlled vocabulary for the eventual index of *The Architecture of Encounter: A Mediated Encounter Ontology*. It is organised into five sections: (I) framework-specific technical terms; (II) inherited philosophical vocabulary repurposed by the framework; (III) proper names; (IV) traditions and programmes; (V) application domains and diagnostics. Annotations indicate where cross-references or subentries are likely to be needed. Page references will be added at proof stage.

Terms marked with † are candidates for a glossary entry if one is added.

I. Framework-Specific Technical Terms

Terms coined or given specialised meaning within MEOW.

Core Architecture

MEOW (Mediated Encounter Ontology of the World) † — *passim; defined Ch. 1*

encounter-event † — *ontological primitive; defined 1.3*

 individuation of — 1.7

 as structured relational occurrence

mediation † — *constitutive condition; 1.4*

 biological

 cognitive

 linguistic–cultural

 as triple mediation

presentational structure † — *unified manifestation; 1.6*

constraint † — *internal stability; 1.5*

 as patterned invariance

 constraint-pattern — *recurring usage*

 constraint transmission — *causation account; 2.9*

 constraint-cluster — *institutional diagnostics; 8.6*

encounter-organisation — *structural arrangement of encounters*

encounter pressure — *epistemic selection mechanism; 5.2*

Subjecthood and Agency

modal differentiation † — *account of subjecthood; Ch. 3*

 substrate-neutrality of — 3.6, *Author Position Statement*

self-maintenance — *generation of perspective; 3.3*

indexical compression — *the 'I'; 3.4*

diachronic narrative compression — *the 'self'; 3.5*

agency without substance — 3.6

aspectual designation — *mental/physical as non-ontological*; 1.3

Logic and Epistemology

coherence grammar † — *account of logic*; 4.2
ontological grammar † — *what grammar smuggles in*; Ch. 7
 object-grammar — 4.6, 7.3
 durative grammar — 7.5
 and substance thinking — 2.7, 7.6
epistemic selection — 5.2
epistemic confidence — 5.7
effectiveness gradient † — 7.8–7.9
 and Production Possibility Frontier — *Author Position Statement*
collective stabilisation — *role of science*; 5.6
stabilisation — *passim*
compression — *epistemic loss*; 5.3
 lossy compression

Perception

affordance † — *encounter-constituted gradients*; 6.2
 saliency-weighted affordance structure — *meaning*; 6.3
saliency — 6.2–6.3
perception without representation — 6.4
cross-modal integration — 6.5
perceptual variation and shared constraint — 6.6

Language

Language Insufficiency Hypothesis (LIH) † — Ch. 7
synchronisation protocol † — *language as*; 7.2
 synchronisation repair — *institutional*; 8.5
bandwidth problem — 7.7
encoding — *of affordance*; 6.7, 7.2
fluency tax † — 7.10
articulatory cumbersomeness — *cf. Author Position Statement*
durative grammar — 7.5
grammatical trap — 10.6
false convergence — 8.7

Social Ontology

second-order constraint system † — *institutions*; Ch. 8
institutional persistence — *through synchronisation repair*; 8.5

overestimation gap — *democratic deliberation*; 8.8
declarative ontology — *Searle's account*; 8.2
what institutions cannot say about themselves — 8.10

Realism

convergence realism † — *Cb. 9*
convergent stability — *objectivity as*; 9.4
cross-perspectival convergence — 9.3
invariant anchor — *relational constraint*; 2.3
filtering does not imply fabrication — 2.8, 9.7
ontology/model distinction — 2.4
scale-dependence — *ontology of objects*; 2.6

Mind and Normativity

apophatic mind † — *Cb. 10*
 apophatic structure — 10.2
 double-entry ledger — 10.3
 retreat into experience — 10.4
 reification error — 10.5
heuristic container — *mind as*; 10.8
hard problem, reframed — 10.9
normativity frontier † — *Cb. 11*; *open frontier*
 as open frontier
cognitivism / non-cognitivism — 11.2–11.4

Methodological Terms

three-tier claim classification — *Preface*
 empirical premises (inherited)
 architectural commitments (proposed)
 diagnostic interpretations (offered)
diagnostic method — *Preface*; *passim*
structural immunisation — *Preface*
vulnerability scan — *editorial process*

II. Inherited Philosophical Vocabulary

Standard terms that the framework engages, repurposes, or critiques.

substance ontology — *critiqued passim*; 1.1, 2.7
noumenal–phenomenal distinction — *as post hoc*; 1.6, 10.7
mind–world bifurcation — *dissolved*; 1.1–1.3

realism–idealism dispute — 1.2, *Ch. 9*
hard problem of consciousness — *reframed*; 10.9
explanatory gap — 10.9
relata — *no-relata objection*; 2.5
property dualism — *addressed in vulnerability scan*
qualia — *see apophatic mind*
representation — *rejected*; 5.5, 6.4
causation — *as constraint transmission*; 2.9
temporal organisation — 2.10
linguistic relativity — *distinguished from ontological grammar*; 7.4
Sapir–Whorf hypothesis — 7.4
deflationary accounts — *Author Position Statement*
eliminativism — *worry addressed*; 3.9

III. Proper Names

Authors and figures engaged substantively (not merely cited in passing).

Primary Engagements

Bergson, Henri — *spatialised thinking diagnostic; duration*; 7.5
Brandom, Robert — *inferentialism; discursive commitment*
Gibson, James J. — *ecological psychology; affordances*; 6.2
Kant, Immanuel — *noumenal–phenomenal*; 1.2, 10.7
Korzybski, Alfred — *‘the map is not the territory’*
Searle, John — *declarative ontology; construction of social reality*; 8.2
Sellars, Wilfrid — *manifest/scientific image; inferentialism*

Secondary Engagements

Austin, J. L. — *speech acts*
Barad, Karen — *relational ontology; agential realism*
Bhaskar, Roy — *critical realism*
Boroditsky, Lera — *language and temporal cognition*
Chalmers, David — *hard problem*; 10.9
Clark, Andy — *predictive processing; situated agents*
Dennett, Daniel — *consciousness; eliminativism*
Dewey, John — *logic as inquiry*
French, Steven — *structural realism*
Friston, Karl — *free-energy principle*
Grice, H. P. — *conversational implicature*
Heidegger, Martin — *being; Dasein*
Hohwy, Jakob — *predictive mind*
Hume, David — *causation; substance*; 2.9

Husserl, Edmund — *phenomenology*
 James, William — *radical empiricism; Ch. 1 epigraph*
 Kuhn, Thomas — *scientific revolutions; paradigms*
 Ladyman, James — *ontic structural realism; with Ross*
 Latour, Bruno — *actor-network theory*
 Matilal, Bimal Krishna — *Indian epistemology*
 Maturana, Humberto — *autopoiesis; with Varela*
 Merleau-Ponty, Maurice — *phenomenology of perception*
 Mumford, Stephen — *powers metaphysics; with Anjum*
 Nāgārjuna — *middle way; Buddhist philosophy*
 Nagel, Thomas — *'What is it like to be a bat?'*
 Noë, Alva — *enactivism; action in perception*
 Pinker, Steven — *language and thought*
 Priest, Graham — *paraconsistent logic*
 Putnam, Hilary — *empirical status of logic*
 Quine, W. V. O. — *ontological relativity*
 Rescher, Nicholas — *process metaphysics*
 Rorty, Richard — *anti-representationalism*
 Rovelli, Carlo — *relational quantum mechanics*
 Sapir, Edward — *linguistic relativity*
 Scott, James C. — *legibility; state simplification*
 Thompson, Evan — *enactivism; mind in life*
 Turing, Alan — *computing machinery and intelligence*
 Turner, Denys — *apophatic theology; darkness of God*
 Bonhoeffer, Dietrich — *negative theology*
 van Fraassen, Bas — *constructive empiricism*
 Varela, Francisco — *enactivism; autopoiesis*
 Whitehead, Alfred North — *process metaphysics; 1.3*
 Whorf, Benjamin Lee — *linguistic relativity*
 Willis, Bry — *MEOW essay (2025); LIH (2026)*
 Wittgenstein, Ludwig — *language games; forms of life*

IV. Traditions and Programmes

actor-network theory — *Latour; 8.1*
 autopoiesis — *Maturana and Varela*
 critical realism — *Bhaskar*
 ecological psychology — *Gibson; affordances*
 enactivism — *Varela, Thompson, Noë*
 free-energy principle — *Friston*
 inferentialism — *Sellars, Brandom*
 ontic structural realism (OSR) — *Ladyman, French*
 phenomenology — *Husserl, Merleau-Ponty, Heidegger*
 predictive processing — *Clark, Hohny, Friston*

process metaphysics — *Whitehead, Rescher*
relational quantum mechanics — *Rovelli*
substance ontology — *critiqued; see Section I*

V. Application Domains and Diagnostics

AI and Mind Discourse

AI-mind discourse — *passim; 3.6, 10.1*
substrate-neutrality — *modal differentiation; 3.6*
Turing test — *reframed*
machine thought — *architectural implications*

Institutional and Political

legal categories as unstable constraint-clusters — *8.6*
policy language and false convergence — *8.7*
democratic deliberation and overestimation gap — *8.8*
institutional fragility — *8.9*

Colour and Cross-Linguistic

colour vocabulary — *cross-linguistic variation; 1.4, 7.4*
Berlin and Kay — *colour term universals*
Davidoff — *colour cognition*

Theological and Contemplative

apophatic tradition — *via negativa; Ch. 10*
negative theology — *Turner, Bonhoeffer*
mysticism — *10.2*

Note on procedure. This term list is a living document. During the paper read, mark any term that appears in the manuscript but is absent from this list. During Draft 2 editing, flag any term on this list that has been cut or substantially reframed. Page references will be added at proof stage, replacing section numbers. Cross-references (*see / see also*) will be finalised at proof stage.
